

TRUSTED DURABILITY SINCE 1947.

Southwest's BlackCat® piston is a premier high quality special nitrile-compound piston that can be utilized in a variety of drilling muds.

Developed to handle the numerous chemicals found in drilling mud today, The Black-Cat piston elastomer has excellent abrasion, chemical and heat resistance.

Key Features Include:

- Excellent liner wear characteristics.
- Maximum working temperature (250°F)
- Can be used in water, oil, emulsions and synthetic drilling muds
- High resistance to chemical breakdown, tearing and abrasion
- Capable to handle moderate solids contained in drilling mud

Part Number	Size / Description
76BBC	4" Black Cat® Piston
78BBC	4 ½" Black Cat® Piston
81BBC	5" Black Cat® Piston
83BBC	5 ½" Black Cat® Piston
85BBC	6" Black Cat® Piston
87BBC	6 ½" Black Cat® Piston
89BBC	7" Black Cat® Piston
