

STYLE DATA SHEET

STYLE

- "S" Wash pipe packing, high temperature

SCOPE

- Elastomer / Fabric composition

MATERIAL

- Packing is composed of fluorocarbon elastomer and para-aramid fabric. Packing is laminated and bonded with a proprietary rubber material at the heel of the packing.

APPLICATIONS

- Typical applications include rotary seals, wash pipe packing and gaskets.

PROPERTIES

- Maximum Pressure: 7,500 PSI
- Abrasion & Tear Strength: Excellent
- Aging & Weater Resistance: Excellent
- Operating Temperature Range: -10°F to 400°F
