

HI PRO 2001 is the ideal drill pipe compound for rotary shoulder applications involving:

- VIBRATION
- HIGH PRESSURES
- EXTREME TEMPERATURES
- WORN OR DAMAGED THREADS

HI PRO 2001 is formulated to adhere to wet joints by displacing moisture, which maximized protection against corrosion and metal-to metal contact. HI PRO 2001 is also recommended for API oilfield casings, tubing and line pipe where vibration, extreme pressure and pressure surges are a concern.

HI PRO 2001 has a low order of toxicity and is a **100% Lead Free** product. However, it does contain TFE-fluorocarbon material and will release toxic gas if exposed to temperatures greater than 500°F(260°C).

Typical Characteristics	
NLGI grade	0 to ½
ASTM Penetration Unworked @60°F (16°C)	330-350
Base Grease	Lithium-12-hydroxystearate
Sulfur Content %	<0.3%
Flashpoint	460°F (237°C)
Solid Content %	40%
Color	Dark Gray
Texture	Grainy
Specific Gravity @ 77°F (25°C)	1.23
Brushable to	0°F (-18°C)
Temperature Range	0 - 500°F (-18°C to +260°C)
Friction Factor	1.09

DO NOT USE ON OXYGEN LINES
