

## EASY TO PRE-CHARGE & MAINTAIN CHARGING ASSEMBLIES

For both onshore and offshore drilling applications, our pulsation dampeners are manufactured and hydro-tested by our legacy in-house team of experts. These dampeners are designed to meet the most demanding large-volume and high-slurry pump applications and provide ease of installation and elongated service life for the operator.

## FEATURES & BENEFITS

---

- Pressure Range 5,000 PSI - 7,500 PSI
- Available Types: Suction, Discharge, Inline Suction
- Built for Durability and Longevity
- Certification Available Upon Request
